

Grand Sea Cemented Carbide rod which is hard and tough, is the raw material of producing the alloy cutting tools such as end milling cutter, drill and reamer. These cutting tools are widely used for metal processing.

We have developed Ultrafine grade Carbide Rods for Super Hard Cutting Tools, such as our grade H09U-T, H06U-T.

Grand Sea Cemented Carbide Rods have good reputation in USA, EU, Japanese and Korea makert.

Grand Sea Cemented Carbide Rods include

1. Tungsten Carbide long Rod unground and ground h5/h6
2. Tungsten Carbide short Rod in h4/h5/h6/h7
3. Tungsten Carbide rod in Inch size in h4/h5/h6/h7
4. Tungsten Carbide PCB rod

Grade Recommendation

材质名称 (Grade)	WC (%)	CO (%)	晶粒度 Grain size (um)	比重 Density (g/cm <sup>3</sup> ) ±0.1	硬度 Hardness (HRA) ±0.5	断裂韧性 KIC (MNm-3/2)	抗折力 TRS (kgf/mm <sup>2</sup> )
H09U	91	9	0.3	14.5	93.7	9.2	>350
H12U-T	88	12	0.3	14.2	93.0	9.6	>350
H06U-T	94	6	0.4	14.9	94.5	8.4	>380
H06U	94	6	0.4	14.9	94.0	8.7	>380
H08U	92	8	0.4	14.7	93.6	8.8	>380
H08U-K	92	8	0.4	14.7	93.2	9.0	>380
H12U	88	12	0.4	14.3	92.5	9.4	>350
H10S	90	10	0.6	14.4	92.1	9.9	>350
H10F	90	10	0.8	14.4	91.8	10.9	>350

Application

材质名称Grade	用途推荐 Applications								
Grade/Sort	H06U	H06U-T	H08U	H08U-K	H12U	H10S	H10F	H09U	H12U-T
